

Amount of Water in Wilson's Watering Can

Wilson began watering his garden with a watering can that was completely full. The amount of water in the can as Wilson was watering can be represented by a linear function and is shown in the graph. Which statement is correct?

The amount of water originally in Wilson's can was 2.5 gallons.

Wilson is watering his garden at a rate of 2.5 gallons per second.

Wilson is watering his garden at a rate of 0 gallons per second.

The amount of water originally in Wilson's can was 0 gallons.

Li believes that the graph shows a direct variation.

Why is Li incorrect in saying that the graph shows a direct variation?

When the x -value is 0,
the y -value is 1.

The relationship is
proportional.

The graph does not have
a constant rate of
change.

The slope is negative.

The distance a baseball travels when a player hits the ball varies directly with the speed with which the player swings the bat. The given graph shows the distances a baseball travels (in feet) and the speed of the swing (in miles per hour).

Based on the graph, which relationship exists between the speed of the swing and the distance the ball travels?

The distance is 0.1 times the swing speed.

The distance is 5 times the swing speed. ✓

The distance is 0.2 times the swing speed.

The distance is 10 times the swing speed.

Caleb made the given table to show the number of hours he works and the amounts he earns over a four-week period.

Caleb's Earnings				
Hours	12	15	18	21
Earnings (in dollars)	140	170	200	230

Which describes whether the relationship between the earnings and the number of hours represents a direct variation?

- The earnings increase at a steady rate, so the earnings do not vary directly with the hours.
- He earns 20 more than 10 times the number of hours he works each week, so the earnings vary directly with the hours.
- The earnings increase by 30 for every increase of 3 hours, so the earnings vary directly with the hours. ✗
- The ratios of earnings to hours are not the same each week, so the earnings do not vary directly with the hours.
